

Eastern Lower Mississippi River Alluvial Plain (ELMRAP)

Dissolved Oxygen (DO) Standard

LEGEND

- Reference Sites
- SW DO Monitoring Stations - STORET
- Lower Mississippi River Alluvial Plain
- Outstanding Natural Resource Waters
- ELMRAP Subsegments
- Inflated Heelsplitter (Potential Habitat - USFWS)
- Atlantic Sturgeon (Potential Habitat - USFWS)
- Listed Species (USFWS)

NOTE: 1) The Reference Sites layer on the map represents Louisiana's least-impacted sampling sites for the ELMRAP ecoregion. 2) The DO monitoring stations layer represents locations from EPA's STORET database which LDEQ monitors for DO and DO Saturation. 3) The Inflated Heelsplitter and Atlantic Sturgeon layers represent areas where USFWS has identified habitat for these species. These areas should not be confused with Critical Habitat.
